FOCUS ON

NEW!

STRETCH DRY SYSTEM

More comfort, less heat: a goal that OMP pursues since always, and now concretizes with STRETCH DRY SYSTEM. The maximum breathability of OMP Dry System is combined with the elasticity of 3D materials, to allow the best freedom in movements while reducing body temperature. Two fundamental elements to help drivers improve their performance.

The cooling effect of the inserts is improved when worn with the OMP ONE breathable underwear that now offers a cooling spray solution. OMP's Dry System is a registered utility model.

STRETCH DRY SYSTEM

DRY SYSTEM

To help drivers reduce body temperature and improve their performance, OMP has designed a range of underwear and breathable clothing. The OMP ONE S line and TECNICA EVO breathable racing suits and underwear to facilitate the body thermoregulation, thanks to the innovative weave of the inserts, strategically positioned, that allow for high breathability while still maintaining their own fire-retardant properties (according to the FIA standard 8856-2000).

The cooling effect of the inserts is improved when worn with the OMP ONE breathable underwear that now offers a cooling spray solution. OMP's Dry System is a registered utility model.
